## Brim Configuration Library

### Brim Collection

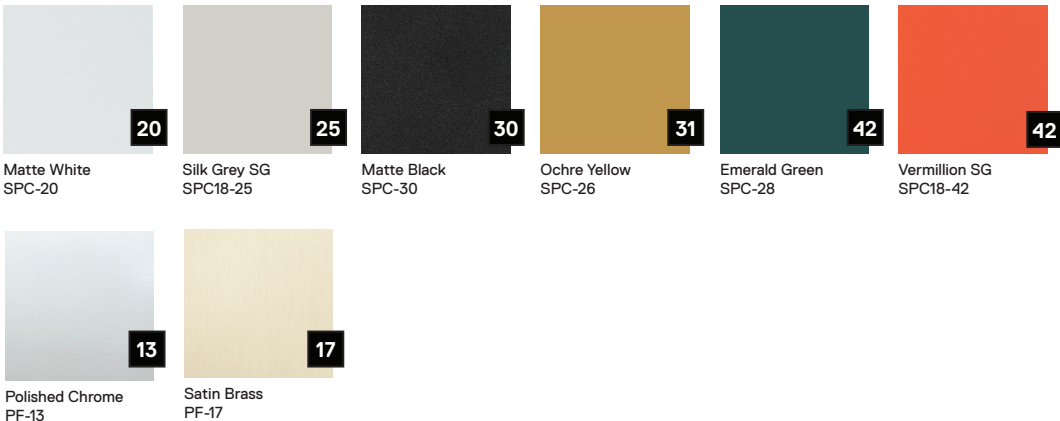

Brim is a minimal, customizable, multi-directional sconce equipped with a swiveling head and simple, column-like shade. The narrow, downward beam of light is ideal for installation as a bedside reading light, but as a sconce of many hats, Brim offers a range of looks suited to various applications. The fully interchangeable shades are available in circular, square, or faceted formats, each designed to highlight different features of an array of finishes. Power cord optional.

Individual finish samples are available at [www.RichBrilliantWilling.com/finishes](http://www.RichBrilliantWilling.com/finishes).
